

Digital Strategy & Event Systems Brief

The website is now live:

mucunguzi256.github.io/guildleaders/

We are now moving from website setup into event operations and attendee engagement.

1. Event Management Platform — Luma

Primary tool: Luma

team:

event

r sponsorship, networking, or community goals.

2. Auto Event Attendee Card / Flyer Generator

WIREFRAME PLACEHOLDER

Photo

Name

Institution

Date + QR

Goal: Let registered attendees upload a photo and generate a personalised "I'm Attending" card to share on social media.

■ **Reference:** ethnile.ar.io/generate-dpa

Designer deliverable needed:

A flyer/card blueprint with dynamic placeholders for:

- attendee photo
- attendee name
- institution
- summit branding
- event date/location
- optional QR code/registration link

Layouts should work for social sharing (square, story, and wide formats).

3. Community & Attendee Support Channel

Proposed: Telegram Group, Telegram Channel, or WhatsApp Channel

Channel already exists.

Managers/admins, define comms structure

Scale of registrations

4. Volunteer Program & Event Support Team

Clarification needed: Will there be an official volunteer program?

Coordination • Community Support • Technical/Setup • Logistics

Needs:

Key Roles

Volunteer registration/application form.

Immediate Deliverables by Team

■ Ops	• Final registration questions • Event logistics • Communication workflow
■ Design	• Attendee flyer blueprint • Event branding assets • Social card templates
■ Community	• Platform setup/status • Support structure • Moderation plan
■ Volunteer	• Programme confirmation • Onboarding workflow • Role allocation

Strategic Objective: Attendee Journey

A 6-step flow to operational efficiency and organic event marketing

1	Discover	event
2	Register	via Luma
3	Join	community
4	Generate	event card
5	Share	socially
6	Participate	in summit

Let's Build the Summit Experience
